

SUMANTH KUMAR GOGINENI

SENIOR SOFTWARE ENGINEER

Microsoft Frontier Transformation Engineer - Titan

sugogine@gmail.com | 601-913-8665 | linkedin.com/in/sumanth-kumar-usm

PROFESSIONAL SUMMARY

Senior Software Engineer with a master's degree in computer science and over 9 years of experience designing and delivering scalable web, cloud, data, and AI solutions across sales and operations, auditing, insurance, education, ecommerce, and logistics. Hands-on expertise in .NET, C#, React, Azure, Microsoft Fabric, Azure AI Foundry, microservices, REST APIs, and enterprise automation. Proven record of leading cross-functional delivery, improving application performance, modernizing deployment practices, and translating complex business needs into secure, production-ready solutions.

CORE COMPETENCIES

Cloud & AI

Azure AI Foundry, Azure OpenAI patterns, Microsoft Bot Framework, Cognitive Services, Azure Functions, Service Bus, Event Hub

Application Engineering

.NET, C#, ASP.NET Core, Web API, microservices, REST APIs, SignalR, asynchronous programming

Frontend

ReactJS, Angular, JavaScript, TypeScript, HTML5, CSS3, Bootstrap

Data & Analytics

SQL Server, Azure SQL, PostgreSQL, Cosmos DB, Microsoft Fabric, ADF, Databricks, Power BI, DAX

DevOps & Containers

Azure DevOps, CI/CD, Docker, Kubernetes, Azure Container Registry, ARM, Bicep, YAML

Quality & Delivery

Agile, Scrum, code reviews, performance tuning, TDD, BDD, Selenium, SpecFlow, Postman, Swagger

PROFESSIONAL EXPERIENCE

HCL America | Senior Software Engineer

Jan 2024 – Present

Domain: MCAPS Americas

- Developed multiple agents for the Hiring Tracker and Employee Assignment tools, supporting hiring request and employee assignment workflows within the MCAPS Americas enterprise dashboard.
- Lead end-to-end engineering initiatives for MCAPS Americas, partnering with stakeholders to architect scalable solutions that streamline cloud sales processes, improve operational effectiveness, and strengthen data-driven decision-making.
- Led the design and development of an enterprise dashboard supporting worldwide Account Management, Employee Assignment, and Hiring Tracker workflows using C#, .NET, React, Azure services, and a microservices architecture.
- Designed and deployed production-grade AI solutions with Azure AI Foundry, integrating large language models, vector search, cognitive services, enterprise APIs, and microservices.
- Built agentic AI applications in .NET using orchestration patterns, LLM-driven reasoning, tool calling, and autonomous workflows, contributing to a 70% reduction in support-request turnaround time.
- Designed end-to-end Microsoft Fabric ETL pipelines for scalable data ingestion, transformation, and loading, with emphasis on performance and maintainability.
- Developed a Microsoft Bot Framework solution, trained language capabilities with LUIS Cognitive Services, deployed it to Azure, and integrated it with Microsoft Teams as a message extension; the solution received recognition from Microsoft leadership.
- Implemented managed identity across sales-domain applications to remove stored credentials and strengthen secure service-to-service access.
- Led code reviews and performance optimization, reducing response times by 15%. Enhanced ReactJS and Bootstrap user experiences, contributing to reported gains in user engagement and satisfaction.

- Build trusted stakeholder relationships and communicate complex technical information clearly for both engineering and business audiences.

University of Southern Mississippi | Software Engineer

Aug 2022 – Dec 2023

Domain: Education

- Developed enterprise web applications and RESTful APIs for internal users using ASP.NET and ReactJS.
- Designed and developed an Azure-hosted chatbot using Microsoft Bot Framework.
- Automated application delivery using Azure DevOps, Docker, and Kubernetes.
- Mentored junior students in object-oriented programming with C++ and Python, operating systems, data structures, and computer networks.

Microsoft | Software Engineer

Jul 2017 – Aug 2022

Domain: Auditing & Insurance

- Developed enterprise web applications using .NET 6, C#, Web API, Angular, React, jQuery, Bootstrap, Azure SQL, PostgreSQL, Azure Data Factory, Azure Databricks, Azure Functions, Application Insights, and Blockchain Workbench.
- Implemented SignalR-based real-time updates, notifications, and live data streaming, improving user experience by 30% and reducing latency by 40%.
- Developed a translation utility for RESX and Excel files using Azure Cognitive Services, supporting translation between multiple languages.
- Implemented and optimized an Azure SQL enterprise solution processing more than 15,000 daily transactions; tuned queries, stored procedures, and views to reduce execution time by 30%.
- Improved REST API performance using asynchronous programming, caching, and query optimization, reducing memory usage by 25%. Secured APIs with JWT and Azure API Management.
- Deployed and managed container images in Azure Container Registry and integrated CI/CD pipelines, accelerating delivery cycles by 40% through automated deployment and testing.
- Built an automated processing pipeline that reduced operational effort by 40%, saved approximately 20 hours per week, and improved reliability and data quality.
- Owned production stability through root-cause analysis, defect resolution, and controlled deployments supporting dependable daily data updates.
- Developed Azure Data Factory ETL pipelines connecting Cosmos DB, Azure Storage, and DB2 sources and destinations.
- Partnered with DevOps engineers to create ARM templates for Azure Logic Apps and Cosmos DB, build CI/CD pipelines, and monitor deployments.

TECHNICAL SKILLS

Programming & Scripting: C#, Python, Java, C++, C, PowerShell, Bicep, YAML

Frontend: HTML5, CSS3, JavaScript, TypeScript, AngularJS, ReactJS, Bootstrap

Microsoft Cloud & AI: Azure AI Foundry, Azure Data Factory, Azure DevOps, Microsoft Fabric, Azure Functions, Service Bus, Event Hub, Microsoft Bot Framework, Cognitive Services

Databases & Analytics: SQL Server, Azure SQL, PostgreSQL, Azure Cosmos DB, Power BI, DAX

DevOps & Platforms: Docker, Kubernetes, Azure Container Registry, ARM templates, CI/CD, Application Insights, Visual Studio, VS Code, JIRA

Testing & API Tools: Selenium, Coded UI, WinApp, SpecFlow, BDD, TDD, Postman, Fiddler, Swagger

Methods: Agile, Scrum, Waterfall, code review, performance optimization, root-cause analysis

CERTIFICATIONS

- Microsoft Certified: Develop AI Apps and Agents on Azure (AI-103)
- Microsoft Certified: Agentic AI Business Solutions Architect (AB-100)
- Microsoft Hypervelocity Engineering Framework
- Microsoft Certified: GitHub Copilot
- Microsoft Certified: Azure Developer Associate

- Microsoft Certified: DevOps Engineer Expert
- Microsoft Certified: Azure Data Fundamentals
- C# Certification
- ISTQB Software Testing Certification

AWARDS & RECOGNITION

- **ERS Star Champion Award, Software Engineering Unit** | 2025
- **STAR Performer, Software Engineering Unit** | 2024
- **Best Consultant / SPOT Award, Microsoft** | 2020–2022
- **Second Place, Microsoft Hackathon** | 2019

EDUCATION

Master of Science in Computer Science **GPA: 3.9/4.0**
University of Southern Mississippi | Hattiesburg, Mississippi, United States

Bachelor of Technology **GPA: 3.98/4.0**
V R Siddhartha Engineering College | Vijayawada, Andhra Pradesh, India
